

Trial Information Summary

ALLG Trial Number:	MPN01
Trial Name: Myeloproliferative neoplasms registry	
Lay Summary: <p>This is a stand alone registry which will collect data from Australian and New Zealand patients over 18 years old with different types of myeloproliferative neoplasms. The patients will generally be newly diagnosed when registered and will have given informed consent. The type of information collected at the time of enrolment will include medical history, test results, disease symptoms, and patients' answers to questions about quality of life. Updated test results, therapies, symptoms and patients' answers to quality of life questions will be entered into the registry each year. This database will be a useful resource for translational research, especially if used in conjunction with tissue banking. This registry will also assist with the planning of future clinical trials for patients with myeloproliferative neoplasms.</p>
